*Urban Land and Property  
Markets in The Netherlands*  
Barrie Needham 2018-05-20  
Originally published in 1993,  
Urban Land and Property  
Markets in the Netherlands  
provides a detailed explanation  
of how the land and property  
markets of the Netherlands  
work. This book describes the  
scene extensively and goes  
deeper to explain the situation  
in the Netherlands, with  
commercial real estate being  
regarded internationally as  
mature, and offering good safe  
investment prospects while  
other aspects of the land and  
property markets are unique to

that country. The  
constitutional, economic and  
social contexts are described  
and current public policies are  
explained as they affect  
property development.

**Capital and Labour in Japan**  
Toshiaki Tachibanaki 2000  
Toshiaki Tachibanaki and  
Atsuhiko Taki emphasise  
several institutional features in  
Japan which differ from those  
in Euro-American countries: for  
example, the permanent  
employment and seniority  
system in wages and  
promotion, the dual structure,

Keiretsu transactions, the main bank system, and intercorporate shareholding. This book examines in particular the distinction between long-run and short-run contractual relationships which produced such features. It presents both the positive and the negative evaluations of the factor market. Exploring the similarities and interdependencies between two important and

idiosyncratic factor markets in Japan, this book brings data to hand which until now has only been available in specialist journals.
